

VOICE BROADCAST

Voice mass communication solutions

Triton offers unique voice broadcast product which is targeted for applications where mass vocal communication is required for commercial and marketing purposes or for community, governmental or political announcements.

Unlike traditional products however, Triton's Voice Mail Direct voice broadcast product goes directly to the targets' mobile voice mail service providing higher delivery rates while at the same time being far less intrusive or disruptive.

Triton Global operates in strict accordance with Canadian telemarketing legislation and by the Canadian national [Do Not Call](#) list with which all Canada-based telemarketing or voice broadcasting campaigns must be compliant.

Voice Broadcast campaigns we have hosted include:

- Direct sales, marketing and advertising campaigns
- Customer retention programs
- Appointment reminders and scheduling
- Communication updates and alerts
- Polls and surveys
- Product recalls
- Cancellations
- Service changes or updates
- Account and fraud alerts

Triton offers comprehensive reporting and analytics in real time 24X7 to view all associated call traffic.

To learn how your company can utilize IVR voice broadcast technology in a discreet, compliant yet more highly effective manner than traditional methods [contact Triton Global](#) today.
