PAY BY PHONE DATASHEET

In-App, Mobile WEB and Fixed Line Payments

Pay By Phone is Triton's flagship product that allows alternative payment providers to implement payment services in Canada with a single point of integration for carrier connectivity and carrier direct billing. The product has unparalleled flexibility and can be used to support payment windows for a single click payments, in-app payments, mobile payments and traditional online web payments. We process payments directly with all major Canadian carriers are a recognized leader for direct carrier integrations.

We ensure complete regulatory compliancy by issuing a mandatory advice of charge (AOC) notification to the consumer who must accept these any charge before the transaction can be completed. Working seamlessly in the background, we process all payments with the carriers and provide complete transparency n all transactions with 24X7 access to our reporting and analytics tool.

PAY BY PHONE

Example of Pay by Phone use for in-app single click payment

Use the single click button to let users purchase digital content, unlock functionality in an app, pay for one-time charges, or add almost anything to the application experience.

**Display your Application Brand Offer and single click Payment button.
Include terms and contact information.**

Subscriptions that are sold with a developer specified, recurring billing cycle are accomplished by issuing a new advice of charge on the anniversary of the particular billing cycle e.g. weekly, monthly, quarterly etc.
