

## Payment Widget Service

Integrate our carrier connections and payment services

When consumers are ready to pay for their purchases online, Triton's Payment Gateway takes care of the collection of the phone information and payment processing with the carriers. Our payment gateway services are simply integrated into the provider's payment pages as required. This white label payment widget services provide seamless integration to our payment partners in desktop web, mobile web or native mobile apps.

With unbeatable conversion rates compared to conventional payment methods, phone payment widgets are a required payment option for any merchant of digital goods and services online.

Research suggests on average that 70% of mobile or fixed line shoppers become buyers when presented with this payment option.

Since carriers have a billing relationship with consumers the payment is simply added to their bill.

Consumers are notified immediately about the outcome of any transaction We provided our clients consumers with bilingual 24X7 support.

## Customized Pay by Mobile Web, WAP or in-app or Pay by Fixed Line Widgets
